

**I want to let you know** that "SILENT RUNNING" has far exceeded my expectations. I'm skeptical when it comes to new products. Had it not been for my conversation with you at the spring Newport Boat Show and having read Power Boats Reports article I would probably have needed a practical demonstration to convince me.

I have a 28 ft retired Lobster boat with a noisy Volvo diesel. The application was tedious with a brush but upon converting to a sprayer with pressure pot it couldn't have been easier. I already had the motor out so I had great access. Two gallons completely covered my entire bilge, engine hatch, and even the engine's crank case. I launched the boat 24 hrs. later.

The first thing I noticed was I could hear the exhaust note at idle while standing on the engine hatch, a new experience on this boat. Wide open throttle with normal conversation, WOW!!! I'm impressed! Best new product in years! I'll gladly recommend SILENT RUNNING every where.  
**- Sincerely, Dave DelPozzo**
